The 35 USC 102 rejections of claims 1-7,12-16 and 21

The 35USC 103 rejections of Claims 8-11 and 17-20 and 22

Made in the office action of 10/16/03 is hereby repeated and

Made Final

Answer to arguments:

Contrary to applicants assertions Te reference to Enzinger does discloses axial sliding motion of the insert element 8 were said sliding element does have a diameter that is different from the main passageway diameter . It should also be noted that that the first end section comprises two openings 11 and 12 which have different diameters. In a reasonably broad reading of the claims this would meet the claimed dimensions fo the first and second passageway diameters .

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.
